CERTIFICATE

This is to certify that the thesis entitled "**Purification and Biochemical Studies of Fibril Forming Protein from *Trichoderma reesei***", being submitted by Mr. Rakesh R. Banka to the Indian Institute of Technology, Delhi, for the award of Degree of Doctor of Philosophy, has been prepared under my supervision and guidance in conformity with the rules and regulations of Indian Institute of Technology, Delhi. The research report and results presented in this thesis have not been submitted to any other University or Institute for the award of any other degree or diploma.

Saroj Mishra
20/5/96

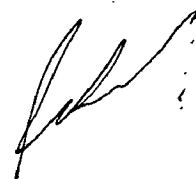

Dr. Saroj Mishra
Associate Professor
Deptt. of Biochemical Engg.
and Biotechnology,
Indian Institute of Technology, Delhi
New Delhi - 110016

ACKNOWLEDGEMENT

A large number of people have helped me in a lot of ways during my work at IIT and I feel indebted to all of them. It is my pleasure to express my deep sense of gratitude to them particularly to

- * Dr. Saroj Mishra, my supervisor, for the expert guidance, constant encouragement and for invaluable discussions and intellectual support.
- * Prof. T.K. Ghose for his innovative ideas and expert advice.
- * Prof. Subhash Chand, Head, Department of Biochemical Engineering and Biotechnology, for providing me facilities and support for my research work.
- * Prof. S.N. Mukhopadhyay, Prof. G.P. Aggarwal, Prof. P. Ghosh, Dr. J.K. Deb and Prof. K.B. Ramachandran for all their encouragement and support.
- * Mrs. S. Mathai, Mr. V.K. Ghose, Mr. Mukesh Anand, Mrs. Renu Sethi, Mr. S.P. Rana, Mr. Bhagwan Singh and Mr. Kishan Chand for culture maintenance, arranging the supplies in the laboratory and for their ever available help.
- * Mrs Neera Verma and Mr. C. Issac for the information support and most enjoyable company.
- * Dr. Shailja Gupta for amino acid analysis, Mr. Sharma for electron microscopy Mr. Khattar for X-ray diffractometry and Mr. V.K. Ghosh for photography.
- * Dr. Tapani Reinikainen, VTT Finland and Dr. Franz Hofer of Austria for kindly providing the antibodies.

- * Mr. J.A. Khan, Mr. D.V. Sharma, Mr. G.P. Yadav, Mrs. Sushma Gupta and Mr. Sant Ram for maintaining the infrastructure in the department.
- * Mr. K.S. Chawla, Mr. S.K. Khurana, Mr. Subhash Anand, Mrs. Sunita Abrol and Mr. C.P. Kalra for their support.
- * Mr. M.S. Negi, Mr. Sunil Dutt, Mr. Chaman Prakash, Mr. Pitambar Dutt, Mr. Shiv Charan, Mr. Mukandan and Mr. Babu Lal for their help and solving my seemingly small but difficult problems.
- * Mr. Apurba Dey, Mr. A.K. Jana, Mrs. Benu Kumar, Mr. Sanjoy Bhattacharya, Mrs. Niharika Nath, Mr. V.V. Praveen, Dr. Nandini Seshadiri, Dr. Siminder Thukral, Ms. Manjula Pandey, Mr. G.R. Satpathy, Ms. Sadhana Sharma, Ms. Jasmedh Kaur, Ms. R.S. Lalitha, Mr. Shaji Joseph, Ms. Monica Chander, Ms. S. Mukhopadhyay, Ms. Priya Chandrakant and Ms. Vandana Goswami.
I thoroughly enjoyed their friendship and company and thank them for sharing my feelings both sweet and bitter.
- * My parents and sisters for their constant encouragement and for bearing all my burdens so that I could dedicate myself to the work.
- * CSIR for the financial support.
- * Dr. A.K. Sengupta and the FITT family for the invaluable support during thesis writing.

(RAKESH R. BANKA)

CONTENTS

Chapter	Title	Page No.
1.	INTRODUCTION	1
2.	LITERATURE REVIEW	6
2.1	Occurrence of cellulolytic microorganisms	6
2.2	Structure of cellulose	9
2.3	Cellulolytic enzyme system of <i>Trichoderma reesei</i>	12
2.3.1	Cellobiohydrolases	14
2.3.2	Endoglucanases	15
2.3.3	β -glucosidase	17
2.4	Purification of cellulolytic enzymes	18
2.5	Structure and mechanism of action of cellulases	20
2.6	Synergism	24
2.7	Adsorption	27
2.8	Disruption of cellulose	30
3.	MATERIALS AND METHODS	34
3.1	Production of cellulase	34
3.1.1	Microbial strain and maintenance	34
3.1.2	Fermentation	34
3.2	Purification of fibril forming protein	36
3.2.1	Diafiltration	36
3.2.2	Gel filtration chromatography	38
3.3	Measurement of fibril forming activity	38
3.4	Characterization of the FFP	39
3.4.1	Molecular Weight Determination	39
3.4.2	Effect of pH on action of FFP	39
3.4.3	Effect of temperature on action of FFP	39
3.4.4	Effect of metal ions	39
3.4.5	Effect of modifying agents and inhibitors	40

3.4.6	Effect of substrate concentration	40
3.4.7	Effect of carbohydrates	40
3.4.8	Amino Acid Analysis	40
3.4.8.1	Hydrolysis	41
3.4.8.2	Derivatization	41
3.4.8.3	Analysis on Reverse	
	Phase HPLC	41
3.4.9	Immunological cross reactivity	43
3.5	Analytical Methods	43
3.5.1	Protein estimation	43
3.5.2	Filter paper assay	44
3.5.3	Endoglucanase activity	45
3.5.4	β -glucosidase activity	45
3.5.5	Cellobiohydrolase activity	46
3.5.6	Reducing sugar estimation	46
3.6	Microscopy	47
3.6.1	Optical Microscopy	47
3.6.2	Scanning Electron Microscopy	47
3.7	Adsorption of FFP on Avicel and Walseth cellulose	47
3.8	Effect of degree of crystallinity	48
3.8.1	Ball Milling of Whatman Filter paper	48
3.8.2	Determination of degree of crystallinity of cellulose	48
3.9	Viscometric measurements	49
3.10	Effect of FFP action on hydrolysis by whole cellulase	49
4.	RESULTS	50
4.1	Production of cellulolytic enzymes from <i>T. reesei</i> D-1/6	50
4.2	Purification of FFP from culture filtrate of <i>T. reesei</i> D-1/6	53
4.3	Disruption of Filter paper by FFP	56

4.4	Characterization of FFP	60
4.4.1	Molecular weight determination	60
4.4.2	Substrate specificity	60
4.4.3	Effect of pH on activity of FFP	61
4.4.4	Effect of temperature on fibril formation by FFP	61
4.4.5	Effect of substrate concentration and determination of kinetic constants	69
4.4.6	Effect of metal ions	73
4.4.7	Effect of thiol reagents and other inhibitors	73
4.4.8	Effect of carbohydrates on FFP activity	74
4.4.9	Amino acid composition and relationship with other cellulases	75
4.4.10	Cross reactivity with antibodies against other cellulases	81
4.5	Scanning Electron Microscopic studies	81
4.6	Adsorption of FFP on cellulose	85
4.7	Effect of FFP on crystallinity of cellulose	90
4.8	Effect of Action of FFP on hydrolysis of cellulose	90
