

POWER SAVINGS AND LOW TEMPERATURES IN REFRIGERATING
MACHINES USING MIXED REFRIGERANTS

C. P. ARORA

B.Sc.(Lucknow), B.E., P.G.D.(Roorkee), M.S.(Illinois)

A Thesis submitted for the Degree of Doctor of
Philosophy in the Faculty of Engineering

DEPARTMENT OF MECHANICAL ENGINEERING
INDIAN INSTITUTE OF TECHNOLOGY DELHI

DECEMBER 1966

ACKNOWLEDGEMENTS

The author wishes to express his deepest gratitude for the privilege of pursuing this research under the guidance of Professor N.P.W. Moore, his Supervisor and Head of the Department of Mechanical Engineering.

Thanks are due to M/S. Imperial Chemical Industries (India) Ltd., for their interest and generosity in supplying Arcton 13 at short notice.

The author also gratefully acknowledges the assistance rendered by the technical staff of the Refrigeration Laboratories at the Indian Institutes of Technology Bombay and Delhi, I.C.A.R. for providing computer facilities and Mr. J.K. Malhotra for the typing of this manuscript.

NOMENCLATURE	(xii)
CHAPTER	
I INTRODUCTION TO MIXED REFRIGERANTS	1
I.1 Applications of Refrigerant Mixtures	1
I.2 Non-isothermal Refrigeration ...	2
I.3 Single Compressor Cascade Refrigeration	5
I.4 Review of Previous Work	6
I.5 Scope of Present Work	8
II THERMODYNAMIC PROPERTIES OF REFRIGERANT MIXTURES	10
II.1 Choice of Refrigerants	10
II.2 Properties of Pure Refrigerants...	12
II.3 Nature of the Mixtures	14
II.4 Temperature Composition Relations	17
II.5 Enthalpy Composition Relations ...	20
II.6 Computer Programming and Diagrams	24
II.7 Entropy Calculations	25
III NON-ISOTHERMAL REFRIGERATION- THEORETICAL ANALYSIS	28
III.1 Irreversibility of the Heat Transfer Processes	28
III.2 Irreversibility of the Isenthalpic Expansion Process	31

III.3	Classification of Mixtures and Selection of Components	33
III.4	Vapour Compression Cycle with Mixed Refrigerants... ..	38
III.5	Operating Conditions	39
III.6	Thermodynamic Analysis of Non-isothermal Refrigeration, Case I	40
III.7	Thermodynamic Analysis of Non-isothermal Refrigeration, Case II	45
III.8	Exergy Analysis	50
III.9	Effect of Precooling	59
III.10	Effect of Composition	65
III.11	Mixed Refrigerant for Low Temperatures, Type B Mixture	69
IV	SINGLE COMPRESSOR CASCADE REFRIGERATION	74
IV.1	Single Compressor Cascade System	76
IV.2	Selection of Components and Operating Conditions	78
IV.3	Theoretical Analysis of Single Compressor Cascade System ...	79
IV.4	Effect of Regeneration	86
IV.5	Equivalent Cascade System ...	89
IV.6	Suction Volume Characteristics...	92
IV.7	Effect of Rectification	95
V	EXPERIMENTAL WORK AND RESULTS ...	101
V.1	Equipment and General Arrangement	102
V.2	The Calorimeter	103
V.3	Heat Transfer Surface Areas ...	105
V.4	Instrumentation	108

V.5	Experimental Procedure	109
V.6	Tabulation of Experimental Results	111
V.7	Calculations... ..	113
V.8	Discussion of Results	114
VI	GENERAL DISCUSSION AND CONCLUSIONS	125
VI.1	Power Savings in Process Refrigeration	125
VI.2	Low Temperatures Refrigeration...	128
VI.3	Future Work	130
REFERENCES	132
APPENDICES	136
