ACKNOWLEDGEMENTS

I wish to thank Professor C.L. Mehta for his help and guidance. I also thank Professor N. Mukunda, Centre for Theoretical Studies, Indian Institute of Science, Bangalore, for his valuable suggestions. I have also benefited from discussions with Dr. D.N. Varma, School of Mathematics, Tata Institute of Fundamental Research, Bombay. I received continuous encouragement from Prof. P.K.C. Pillai, Head of the Department, particularly in the absence of Prof. C.L. Mehta. I am highly indebted to all my friends for their help and cooperation. I would also like to thank Mr. K. Giri for typing of my thesis. I also thank Prof. J.H. Eberly and Dr. F.T. Hioe, Department of Physics and Astronomy, University of Rochester for stimulating discussions on this work.
